

**Basic Literacy & English Language
Tutor Training Schedule ~ Spring 2019**

BASIC LITERACY TUTOR TRAINING:

The written word bombards us daily. We're expected to read information constantly. For about 25% of our population, reading proficiently is difficult and sometimes impossible. Teaching an adult to read does not require an education degree. It does require patience and desire to transform an adult's life through literacy. The 14-hour training certification provides teaching strategies, adult learning models, information on learning disabilities and lesson planning.

ENGLISH LANGUAGE LEARNER TUTOR TRAINING:

Imagine living in a community where you do not understand the language and cannot read the written word. Now, imagine yourself as part of someone's solution. Teaching a person to speak and read English doesn't require that you know the other's language. It means you have to have the patience and desire to teach language, life skills and cultural differences. This 14-hour training certification introduces second language acquisition, culture, teaching strategies, approaches, and drills.
